Academics

- **Vidyalankar Institute of Technology** 2023 - 2027
B.Tech in Computer Engineering , CGPA - 9.8
- **KJ Somaiya College of Science and Commerce** 2021 - 2023
Bi-focal Science (Electronics) , 86.5 %

Experience

- **Full Stack Developer Intern - Ekdrishti Group Pvt. Ltd** July 2026 - Present
 - Sole developer responsible for the end-to-end design, development, deployment, and maintenance of scalable full-stack web applications using modern web technologies.
 - Collaborate directly with clients to gather business requirements, translate them into technical solutions, and design intuitive, user-centric application workflows.
 - Drive the complete software development lifecycle, including requirement analysis, feature implementation, testing, deployment, debugging, and continuous product enhancements.
- **Web Developer Intern - DreamVentz Private Limited** Jan 2026 - Mar 2026
 - Contributed to the development of a full-stack event management platform using MERN-stack building responsive user interfaces and scalable backend services.
 - Designed and implemented RESTful APIs, database models, and core application features to support authentication, venue management, booking workflows, and event planning.
 - Collaborated closely with cross-functional teams to understand product requirements, participate in code reviews, troubleshoot issues, and deliver high-quality, maintainable software within agile development cycles.

Project Work

- **RepoMind AI – AI-Powered Repository Analysis Platform**
 - Developed RepoMind AI, an Agentic AI platform that enables natural language interaction with any GitHub repository using LangGraph, Google Gemini, React, MongoDB and Qdrant delivering context-aware repository understanding without cloning the codebase.
 - Engineered a multi-agent RAG pipeline featuring query rewriting, two-stage semantic retrieval, regex-based dependency analysis, iterative research loops and real-time streaming responses, significantly improving retrieval accuracy and reducing response latency.
- **MediCare+ | Full-Stack Healthcare Management Platform**
 - Developed a full-stack healthcare appointment management platform using React, Node.js, Express, MongoDB, enabling patients to discover doctors, book consultations, manage medications, and maintain digital health records through a secure and intuitive web application.
 - Implemented appointment booking, comprehensive rescheduling workflows, role-based access control, doctor reviews, patient health overview and medication management, delivering a seamless experience for patients, doctors, healthcare facilities, and care providers.

Skills

- **Languages :** Java , JavaScript, Python
- **Database :** PostgreSQL, MongoDB
- **Core Concepts :** Data Structure & Algorithm, Object Oriented Programming, DBMS
